

# KHDET

# EMITTER TUBING

## ADD ON KIT FOR THE

# ♥ HEART OF THE GARDEN

This add on kit is perfect for watering trees and shrubs.

**Kit Includes:**

(1) DET121- 100' ½" Emitter Tubing  
12" spacing, 1 GPH/emitter

(1) ELC- Coupler

(10) CF8- Figure 8 Ends

(20) SUHD- Hold Downs

(10) EL14B- Easy Loc x ¼" barb

---

**Instructions:**

1. Stake down your mainline tubing (from the Heart Kit) along a row of trees or shrubs.
2. Attach the large barb of the EL14B to a sufficient length of emitter tubing to encircle the plant. (Tubing is easy to cut with pruners or scissors).
3. At each plant, punch a hole in the mainline tubing and pop in the ¼" barbed end of the EL14B.
4. Flush the lines and then close off the end of each loop with a CF8. Use the hold downs (SUHD) provided to stake down the emitter tubing.
5. Turn your water on and check the wetting pattern.
