SOAKER DRIPLINE

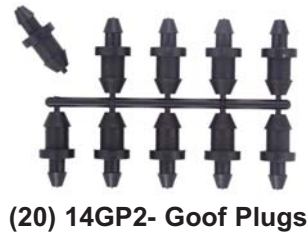

ADD ON KIT FOR THE

♥ HEART OF THE GARDEN

This is micro irrigation at its easiest for window boxes, planters, irregularly shaped areas, raised beds or row crops.
Kit Includes:

(1) DSD12- 100' roll (12" Spacing, ½ GPH/emitter)

(20) 14GP2- Goof Plugs

(20) 14TB- Transfer Barbs

(20) SS3- ¼" Hold Downs

Instructions

1. Lay out and stake down the mainline tubing in the Heart Kit.
2. Insert a transfer barb into one end of the Soaker Dripline and unroll the length desired.
(The maximum run length for this Soaker Dripline is 28 feet).
3. Cut the Dripline halfway between two emitters and plug the other end with a Goof Plug (14GP2).
4. Punch a hole in the mainline tubing where you want to branch off with a run of soaker dripline.
5. Insert the transfer barb that's at the beginning of the Soaker Dripline into the hole.
6. Use ¼" hold downs (SS3) as necessary to stake down the Dripline.
7. Repeat for all Soaker Dripline runs.
8. Turn the water on and check the wetting pattern.
