

KHED

EIN DOR

MINI SPRINKLERS

ADD ON KIT FOR THE

♥ HEART OF THE GARDEN

These are a favorite with our customers, watering broad areas with just a few sprinklers. Each sprayer has an eleven foot diameter circle and provides 18 gallons per hour.

Kit Includes:

Instructions:

1. After the mainline tubing from the Heart kit has been laid out and staked down, determine where you want your sprayers. The support stakes provide you with 2' of tubing.
2. Put the stake in the ground and run the tubing connected to the stake back to the mainline.
3. Where it meets, punch a hole in the 1/2" tubing with the yellow punch (Heart Kit), and insert the barb on the end of the support stake tubing.
4. Push the sprinkler head into the press fit barb on the stake end of the tubing. (See picture on right)
5. When all the sprinklers are situated, turn the water on and check the wetting patterns.

**(10) MESK
Support Stakes with tubing**

This end inserts into the press fit barb.
